Assignment I204a Feedback

This feedback is effectively a code review; to keep it concise, notes are provided as a numbered list. Inline comments in your code illustrate an example of the numbered item (there may be more). Asterisks (*) denote high-priority issues. If any code review item is unclear or if the resulting proficiencies are not self-explanatory, please ask me.

Jeffrey Fennell

jtfennell / jefftfennell@gmail.com

1. No published version (*4a*)
2. Tab in the source code (yes, even if just one, *I will hunt you down and find you :)*) (*4c*)
3. Creation is peppered with alerts—use temporary web elements to display debugging information so that the touch sequence isn't disrupted (*4a*)
4. Nice feedback for deletion (*2b, 3a, 3b, 4a*)
5. Inappropriate reliance on `id`—you already have the collection of drawing areas in `jQueryElements`; this event listener should be added within that framework (*4a, 4b*)
6. Incorrect indentation (*4c*)
7. No `var` keyword—these are top-level variables! (*4a, 4b*)
8. Delete condition does not include out-of-bounds *above* and *to the left* of the drawing area (*4a*)
9. Suboptimal or inconsistent spacing (*4c*)
